

Technological expertise

- Navigation/coverage
- Modelling
- Control (including human-in-the-loop)
- Localisation

Application areas

- Aquaculture
- Shipping
- Ports, coastal and offshore infrastructure

Who we are

We are the first robotics laboratory and digital innovation hub (DIH) in Cyprus (established in 2011). We engage in research, technology development, innovation and commercialisation activities. The team has decades of combined robotics, technology and product, and business experience in the US and Europe. We have worked with commercial entities of all sizes (start-ups to multinationals) as well as academia, government agencies and NGOs.
